

# Shawn F. Murphy

<http://smurp.com>, Saltspring & Berlin, [linkedin.com/in/smurp](https://www.linkedin.com/in/smurp), +1-650-503-4034, [smurp@smurp.com](mailto:smurp@smurp.com)

**Introduction:** Shawn Murphy is a software architect, knowledge engineer, software developer, development team leader, programming coach and trainer. He designs and builds large data-driven, scientific, academic, collaborative, e-commerce and publishing systems. He is fluent in diverse programming languages, knowledge representation technologies, frameworks, visualization tools, RDBMSes, ORMs, APIs, standards, methodologies and architectural styles.

Inspired by emergent phenomena and self-organizing systems, he is focused on exploiting knowledge representation, collaborative filtering, evolutionary pressure and mass customization strategies for building out a global-scale knowledge management ecosystem wherein software, knowledge and presentation co-evolve under the pressure of human opinion — in short, technologically grounding our collective intelligence, so we can meet the challenges of our time.

<b>Professional Specialties:</b>	<ul style="list-style-type: none"><li>• Knowledge Representation</li><li>• Knowledge Publishing</li><li>• Extreme Programming</li><li>• Electronic Data Interchange</li><li>• Open Source / Free Software</li><li>• Test Driven Development</li><li>• Asynchronous Web Servers</li><li>• Data, Context, Interaction</li><li>• Identity Management</li><li>• Semantic Web</li><li>• Collaborative Filtering</li><li>• Relational Databases</li><li>• Object Relational Mapping</li><li>• Object Oriented Programming</li><li>• Dynamic Graphics</li><li>• Pattern Languages</li><li>• Browser Extensions</li><li>• NoSQL Datastores</li></ul>				
<b>Languages, Formats, APIs and DTDs:</b>	<ul style="list-style-type: none"><li>• Python</li><li>• Javascript</li><li>• Java</li><li>• Coffeescript</li><li>• Postscript</li><li>• SQL</li><li>• Bash</li><li>• Perl</li></ul>	<ul style="list-style-type: none"><li>• Scala</li><li>• ObjC</li><li>• Nim</li><li>• C</li><li>• AWK</li><li>• Scheme</li><li>• Smalltalk</li><li>• LISP</li></ul>	<ul style="list-style-type: none"><li>• HTML5</li><li>• CSS</li><li>• SVG</li><li>• XML</li><li>• JSON</li><li>• jQuery/UI</li><li>• D3</li><li>• &lt;canvas&gt;</li></ul>	<ul style="list-style-type: none"><li>• Angular</li><li>• React</li><li>• Selenium</li><li>• DocBook</li><li>• SGML</li><li>• L<sup>A</sup>T<sub>E</sub>X</li><li>• Markdown</li><li>• Make</li></ul>	<ul style="list-style-type: none"><li>• RDF*</li><li>• OWL</li><li>• OKBC</li><li>• N3</li><li>• TriG</li><li>• TMAPI</li><li>• CTM</li><li>• LTM</li></ul>
<b>Standards Implemented:</b>	<ul style="list-style-type: none"><li>• TMDM</li><li>• Digest Auth</li><li>• OKBC</li><li>• RBAC</li><li>• RETS</li><li>• ANSI X12 EDI</li></ul>				
<b>Systems:</b>	<ul style="list-style-type: none"><li>• Linux</li><li>• AS/400</li></ul>	<ul style="list-style-type: none"><li>• OS X</li><li>• NeXTstep</li></ul>	<ul style="list-style-type: none"><li>• iOS</li><li>• Windows</li></ul>	<ul style="list-style-type: none"><li>• Android</li><li>• AppleII</li></ul>

## Experience:

Founder & CEO

[Nooron Collaboratory Inc](#)

2015 to present

Edmonton, Saltspring, Berlin

Nooron is a web-based productivity suite, decision support and collective human cognition platform. It consists of a novel semantic database backend and flexible frontend which includes knowledge management, data visualization and collective intelligence application development tools. Shawn Murphy leads this three person company and also serves as chief software architect and lead programmer. Nooron Inc is funded by angel investment and also by revenue from services delivered to a consortium of universities including the University of Guelph, the University of Alberta and Cambridge University.

Fullstack Software Engineer

[Connectifier](#)

2013 to 2014

Orange County, California

Using Java, Scala, AngularJS, the Play Framework, MongoDB, Elastic Search and Selenium as part of a startup team to build a category leading recruiting platform. Connectifier uses big data and machine learning techniques to crawl the web and social networks for CV and contact information to empower recruiters specialized in hiring software engineering talent. Shawn was engineer #6 after the four initial Google software engineers. Shawn left to found Nooron Collaboratory. Connectifier was later acquired by LinkedIn.

Architect & Programmer

[The Orlando Project](#)

2013 to 2014

Universities of Alberta, Guelph & McGill

Coding and architecting an animated highly interactive semantic visualization research platform using D3, Canvas, RDF and NodeJS for a university consortium working in the digital humanities. It features multi-modal interactivity ( using direct manipulation; bulk specification and a novel semantic graph layout specification language ) to support visual exploration of a large text corpus.

Founder, CTO, Software Architect

[Semandra, Inc.](#)

2011 to 2014

Saltspring Island & Edmonton

Semandra provided full-service front-to-backend website development specializing in graphics-intensive designs with multimedia integration, database-driven backends with complex programming requirements, and content-rich user-maintainable CMS sites.

- Ponderate — an agile, collective knowledge curation and evaluation tool
- TOBFleet — a RESTful web service which simplifies vehicle fleet integrations
- Theamatic — a web application for repertory theatre and film festival management.
- CReturns — a graphical scheduling system, e-commerce solution and Salesforce integration for this home energy auditing and retrofitting service

Principal

[smurp.com](#)

2002 to 2011

Edmonton, AB

Smurp.com provided contract programming and consulting services with a focus on database-backed web sites and complex data processing operations.

- PyOKBC — A Python implementation of the *Open KnowledgeBase Connectivity* system of knowledge representation and abstraction. It was designed to provide a single consistent interface to diverse structured information sources, to include ontologies, relational databases, xml documents, and topic maps.
- PyRETS — An implementation of the *Real Estate Transaction System* for keeping the Vancouver Real Estate Board synchronized with MLS.ca
- CatPub — A database publishing technology consisting of a Postscript templating system over a relational database back-end. Suitable for automatically preparing complex, highly customized, Postscript and PDF publications such as directories and catalogs, it is closed source software created under contract for a firm providing publishing services to the real estate industry. It is producing on the order of 10 thousand unique catalog pages every day containing constantly changing data for the largest real estate boards in Western Canada.

- TKQ2.0 — A Django e-store system vending e-books for hundreds of educational publishers, through a dozen store-fronts, with sophisticated features such as promotions, steganographic watermarking in PDF, bundling, coupons and more.
- TKQW — A Medusa-based “digital drop-shipping” system enabling digital goods sale and delivery by untrusted 3rd parties.
- ModelViz — Added dynamic SVG-based touring facilities to this Django model entity-relationship visualizer.
- Alberta Lodging Association — A Django-based lodgings database backing a web site, a printed directory and an associated advertising sales and layout system.

Founder, Chairman and VP, R&D  
Oct 1995 to Jan 2003

[Emergence by Design, Inc.](#)  
Edmonton, AB

Shawn Murphy founded Emergence by Design along with four colleagues to pursue the development of *The Idea Engine*. To fund the ongoing development of TIE, EbD became a dot-com factory, providing consulting, development, hosting and ecommerce services to new dot-com ventures. Shawn was VP of R&D, lead developer and chief architect of this 15-person organization, until selling his interest in 2003.

- TheIdeaEngine — architect and lead developer of this R&D project developing a distributed knowledge representation system using Java (and JDBC), Perl (and DBI), Scheme, and various SQL backends. The effort included the implementation of the OKBC (Open Knowledge Base Connectivity) specification in Java and Perl, the authoring of a multithreaded knowledge server and the creation of many perl CGIs, Java Applets and Applications.
- [GetCited.org](#) — chief architect and lead developer on this massive, highly abstracted academic bibliographic portal system featuring:
  - reference and citation cross-references
  - per-publication discussion forums
  - curriculum vitae management
  - links with Amazon and other vendors for associate referral income
  - seeded with MARC Book and Serials databases from Library of Congress
  - rich array of publication types (proceedings, books, articles, manuscripts, bibliographies, etc)
  - tracking of individual/institutional affiliations
  - sophisticated statistics on publishing influence of nations, institutions and individuals based on citation counts
- [DedicatedTeacher.com](#) — architect and lead developer for this large, highly abstracted ecommerce engine featuring:
  - sells both ‘digital-goods’ (eg. MP3s and PDFs of books) and ‘tangible goods’ (printed books, CDs, educational kits)
  - complex shipping options
  - multiple suppliers per store
  - sophisticated coupon, bundle, sale and promotion features
  - serves store fronts for various companies (e.g. Scholastic)
  - supports multiple currencies, multiple credit-card transaction backends simultaneously and selectively (depending on currency, card-type, availability, etc.)
- [Law Opinion](#) — architect and developer of the worlds first E-Commerce facility for the provision of paid legal opinions. It included numerous encryption safeguards to ensure complete client confidentiality; a system for letting people pick the nearest lawyer with experience in the chosen area of the law; and a sophisticated, dynamic, system for performing branching automated interviews.
- [FindAMentor.com](#) — architect and lead developer of this system for helping people find and interact with mentors in various areas of their lives; complete with anonymization and multiple personal profiles in different areas of interest

- EmailDirector — architect and developer of this web-based school management system with parallel web and email interfaces and sophisticated email transaction system for, at that time, Canada's largest e-school with 2500 grade-school students
- EStore — architect and developer of this web interface for creating E-Commerce websites using NGage Electronic Commerce technology
- recruiter matchmaking system — salvaged, re-architected and built out a head-hunting firm's matchmaking system for staffing high-tech jobs based on skill, locality and position type
- ClickTrace — architect and developer of this web log mining facility
- Domainatrix — architect and developer of this toolset for bulk management of domain registrations, DNS configurations and network interface configuration
- Edmonton Chamber of Commerce Annual Directory — architect of this database-driven directory including ads and equivalents of white pages and yellow pages
- magazine publishing system — architect of this complete publishing solution with extensive features for advertising sales management and ad layout automation

Systems Analyst III  
1990 to 1995

Gov't of Alberta  
Edmonton, AB

Shawn Murphy was responsible for analysis, design, programming, training and support of LABBASE: a multi-disciplinary LIMS (Laboratory Information Management System) coded in Paradox and WordBasic. It co-operated with a legacy AS/400 application written in RPG/400 and CL, which he also maintained. During this project he managed two other programmers, the AS/400 administrator and a tech support person.

Principal  
1990 to 1995

Sapient Systems  
Edmonton, AB

Sapient Systems specialized in the creation of desktop database apps.

- Wrote *FastEDI* in PAL (the Paradox Application Language) to provide a subset of the ANSI X.12 (V3.020) Electronic Data Interchange system for an oilfield supply company interested in easing the ordering process for the many regional offices of their large clients in the oil patch. *FastEDI v1.0* implemented the transaction sets for Price/Sales Catalog (832) and Purchase Order (850) thus enabling the electronic distribution of the latest pricelist and placement of orders.
- Created a *Disability Inventory & Assessment System* for an Educational Consultant to use as a proof of concept of her doctoral work for possible productization.
- Created a *Property Management System* for a Realty Firm to track the features, locations, prices and owners of available commercial real estate to facilitate showing to clients
- Attended "NeXT Developer Camp" and wrote *Elements.app*

Executive Director  
1990 to 1992

TechnoWatch Society  
Edmonton, AB

Founded and managed this non-profit think tank focused on the strategic impacts of emerging technologies such as nanotech, biotech, AI and robotics. Put on presentations, guided staff, and conducted a scientific literature review.
